If you have to save your pennies and get the most from what you spend—buy Campbell's Clothing for your winter outfit. You'll get a longer life with better looks while you wear it from Campbell's Clothing than from any other.

Wm. McLAUGHLIN, Reg., 21 McGill College Ave.

ORIGINAL GENUINE Horlicks Malted Milk
Instantaneous Lunch, Invigorating.
The Food-Drink for All Ages—Highly Nutritious and Convenient
Rich milk, with malted grain extract, in powder form—dissolves in water—more healthful than tea or coffee. Used in training athletes. The best diet for Infants, Growing Children, Invalids, and the Aged. It agrees with the weakest digestion.
Ask for "HORLICK'S"—All Chemists, Hotels, Cafes and Stores. Don't travel without it. Also keep it at home. A lunch in a minute. In Lunch Tablet form, also, ready to eat. Convenient—nutritious.

ACT QUICKLY!

Take NA-DRU-CO
SYRUP OF
Linseed, Licorice & Chlorodyne

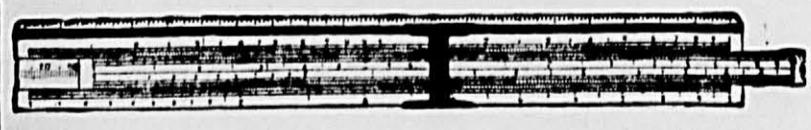

A sudden chill—a dry, burning sensation in the nasal passages—a stuffy up feeling in the bronchial tubes—a pain in the chest—any of these warnings demand instant action.

One of the first things to do is to take Na-Drus-Co Syrup of Linseed, Licorice and Chlorodyne. It checks the inflammation, allays the fever, promotes expectoration, loosens the cough, and starts you on the road to recovery. 327

Keep a 25c. or 50c. bottle in the medicine chest. It is a reliable first aid, and a safe one, as it is free from any harmful ingredients.

To Which Everyone Should Be A Reporter

The executive of the Athletic Association will hold a meeting Wednesday at 12 o'clock sharp, in the Union. All should be present.

The smoker to be held Wednesday by the Western Club promises to be a very enjoyable affair. All members are requested to attend.

The Juniors and Sophomores of the R.V.C. will debate to-morrow at 2 p.m. in the Common Room on the subject: "Resolved, that war is an essential factor in the highest development of a nation." This is the final round in the inter-year debates and promises to be very interesting. Miss M. Currie and Miss A. Douglas defend the negative, and Miss L. Irwin and Miss E. Price uphold the affirmative.

March 1st is eagerly looked forward to, by the Medicals, as it is the date set for the Coronation of King Cook.

THE CHRIST OF THE ANDES.

On the boundary line between Argentina and Chile, 12,000 feet above sea level, there has been erected the Christ of the Andes, a huge monument in commemoration of the peace-treaty between the two countries, which was signed under the arbitration of King Edward of Great Britain. The co-operation of the two countries, and was unveiled in 1904, has for a base a huge block of marble, on the sides of which are inscriptions, pledging perpetual peace between the two countries. The base is surmounted by a large bronze figure of Christ, one hand holding the cross and the other raised as if to give a blessing.

Harry Nolan, son of the late J. P. Nolan, a well-known commercial lawyer, of Calgary, is the latest Rhodes scholar for Alberta. The new Rhodes scholar graduated last year at the University of Alberta.

The American Club Holds a Fine Smoker

Prof. Willard Gave an Address on "Washington as a Surveyor"

NEW EXECUTIVE ALSO ELECTED

This Smoker Closes the Activities For This Year of the American Club

The members of the American Club enjoyed the smoker held in honor of Washington's birthday at the Edinburgh Hall last night. What was lacking in numbers was made up in enthusiasm. This smoker marked the closing of the most successful year that the American Club has known during its existence. It is hoped that next year, under more favorable conditions the club will have even greater success.

Prof. Willard spoke on "Washington as a surveyor." Mr. Fugler made his first appearance as an after-dinner entertainer at the club, and was warmly applauded. Mr. Noblin rendered national airs on the piano.

The following officers were elected for the ensuing year: Hon. president, Dr. W. C. Willard; President, H. L. Golay; Sec. '16; vice-president, C. R. Gibbs; Sec. '16; sec-treas., J. E. Fugler.

The retiring president, R. E. Elliott, of Med. '15, in a few well-chosen words, thanked the club for its support during the past year and wished the new executive even more success for the coming year. The meeting adjourned with the McGill yell and "God Save the King."

Many Grads. to Attend Smoker of Westerners

This Will Probably Be the Last Open Meeting of the Club This Season

What will probably be the final important meeting of the Western Club will be held to-morrow evening in the form of a smoker at the Union. The previous smokers given by the club this season have been of a very high order, yet this one promises to surpass them all. Many McGill graduates are to be the guests of the club for the evening, among them Messrs. H. C. Dixon, M.D., a former ex-president; G. A. Anderson, B.Sc.; H. S. Reid, B.A.; Lieut. A. B. Walters, M.I.E., of the Field Ambulance Corps; and Drs. D. Hartin, C.R. Bourne and A. S. Kirkland.

The musical programme will be exceptionally good. A mandolin trio by Messrs. Gordon, Price and Dempster, will be rendered as well as a violin duet by Messrs. Barrett and Green. Mr. "Buck" Yeo will sing, and a clarinet solo will be given by Dean Robinson. All accompaniments will be played by Mr. Dilworth.

All provision has been made for plentiful refreshments and "smokes."

VARSITY DEBATERS WINNERS OF TITLE

The University of Toronto defeated the University of Ottawa in the first inter-university debate at Ottawa last week. The subject was, "Resolved, that Capital Punishment Should be Abolished." The Toronto team, Messrs. W. Mc. Clarke and John Line, took the affirmative and their Ottawa opponents on the negative side were Messrs. J. A. Grace and J. D. Adams. Hon. Sir Louis Davies, John S. Ewart, K.C., and T. D'Arcy McGee acted as judges.

One of the most remarkable developments of the psychology of the war has been the bland and childlike surprise of Germany at the hatred which her actions have earned in all the neutral countries. We have to-day fresh evidence of this universal detestation of Germany, her ambitions, and her barbarities. It is announced that Great Britain has made a loan of five millions to Roumania, and it can, at least, be said that such a loan is not made in the midst of such a war as this in order that Roumania may be strengthened to show any favor to Germany or Austria. The talk of Italy's intervention on the side of the Allies at an early date is also denied, and serious statements made in the British Parliament show an increasing uneasiness created in Holland by Germany's continuing breaches of neutrality. As far as America, despite the frantic campaign pro-German enthusiasts and the remarkable character of much of President Wilson's policy, there has never been any doubt that the great majority of American citizens do not like Germany any other ways.

Germany, indeed, finds herself after nearly six months of war a pariah among the great and civilized nations, and the consciousness of this leads to a querulous astonishment. It is, of course, easy for German apologists to ascribe this infamous isolation to the vile machinations of England. But this parrot can hardly ratify the most abominable German. The truth, so plain that all may see it, is that Germany has been betrayed to inevitable ruin and the horrified detection of her neighbors by the things that she has done. No impartial person is in any doubt as to the responsibility for the war. Dr. von Bethmann-Hollweg's absurd excuses for the "scrap of paper" speech have deceived no one.

The wanton violation of Belgium's neutrality, following the precipitate declaration of war on Russia and France, fixed on Germany the guilt of this blood. The unspeakable atrocity.

There will be boxing practice every night at 7:30 from now until the Wicksteed competitions.

are inscriptions, pledging perpetual peace between the two countries. The base is surmounted by a large bronze figure of Christ, one hand holding the cross and the other raised as if to give a blessing.

Harry Nolan, son of the late J. P. Nolan, a well-known commercial lawyer, of Calgary, is the latest Rhodes scholar for Alberta. The new Rhodes scholar graduated last year at the University of Alberta.

Futures

To-day

5.00—Boxing practice.
5.30—Water Polo, Y.M.C.A. Tank.
5.30—Swimming tests, Y.M.C.A. Tank.

To-morrow

7.15—Fencing practice.
7.30—Boxing practice.
12.00—Meeting of Executive of the Athletic Association in Union.
3.00—Final Inter-year Debate at the R.V.C.
4.30—Preparation for Wicksteed competitions.
5.15—Gym. classes also for Wicksteed competitions.
7.30—Boxing and Wrestling.
8.00—Western Club Smoker.

Feb. 26—Hall Residents' Dance at the Union.

Mar. 1—King Cook Celebration.

Mar. 8—Wicksteed Gym. Competition.

Mar. 10—Wicksteed Gym. Competition.

•

At the meeting of the Class of Arts '15 held yesterday morning much important business was transacted. Owing to the departure from college of Bob Fraser and Harry Beauty, it was necessary to elect an acting vice-president and secretary, to fill the positions left vacant by the enlistment for active service of the two above-mentioned men. L. H. Ballantyne was chosen as vice-president and J. H. Robertson as secretary.

Clifford Oughtred, president of the Literary and Debating Society, and last year winner of the Reform Cup for Public Speaking, is the Arts Valedictorian for this year. He was the unanimous choice of the meeting and doubt will fill the position splendidly, adding new laurels to those he has already acquired.

It was decided to hold a graduation dinner, and a committee was elected to take charge of all arrangements for the function. Oliver, Gibb and Robertson are the members of the class who will undertake to put through the necessary work in connection with the dinner. Special attention was paid to this matter of the dinner and was only after much discussion and wrangling that it was finally decided to let the satisfaction of most of those present.

D. J. Donaghue will be the class poet, his ability in this branch of literary effort being well known. The president and acting vice-president of the class will represent Arts on the general committee which will have charge of the arrangements in connection with graduation exercises.

The meeting was well attended, and owing to the number of matters coming up for discussion a whole hour was passed before all the business was completed and the meeting adjourned.

The musical programme will be exceptionally good. A mandolin trio by Messrs. Gordon, Price and Dempster, will be rendered as well as a violin duet by Messrs. Barrett and Green. Mr. "Buck" Yeo will sing, and a clarinet solo will be given by Dean Robinson. All accompaniments will be played by Mr. Dilworth.

All provision has been made for plentiful refreshments and "smokes."

All British Victoria Crosses are manufactured from canons taken from the Russians at Sebastopol.

The total enlisted strength of the army of the United States of America is limited by law to 100,000.

King George V. is related to nearly all the reigning houses of Europe, one exception being Austria-Hungary.

The London Salvage Corps, maintained by the various insurance companies, consists of ex-army men.

Under an act of King Charles I. gamblers losing more than \$500 at one time were not compelled to pay.

Railway companies in the United Kingdom must take out an annual license, costing \$5 for each restaurant car they run.

Some German sappers who were preparing foundations for guns near Cracow a short time ago came, in the course of their excavations, upon a number of quaint urs, bronze utensils and so forth, which have been pronounced by Cracow experts to date from prehistoric times, and to be very valuable specimens. A representative of the Cracow Academy of the Sciences is to superintend further excavations.

The Iris universities seem to have been the forerunners among British institutions of higher learning in admitting women to equal standing with men. The University of Dublin was the first of residential universities to admit women in the year 1864. In October of the National University of Ireland we read:

"Women shall be eligible equally with men to any members of the university or of any authority of the university, and to hold office or to en-

tertain the university."

Women were supposed to conceal their knowledge if they possessed any, much as the Egyptian fellahs secreted their savings from the Turkish

Government.

M.A.A.A. TEAM AGAIN DEFEAT MCGILL SEVEN

Red and White Team Could Not Get Past the M.A.A.A. Team

NATIONALS ALSO BEAT VICTORIA

Last Night's Games Result in Three-Cornered Tie For Championship

The play-off of the two games in the City League at the Arena last night, resulted in two very fast games. In one of the best games of the season, Nationals beat Victoria 2-1 and their chances for the championship look very bright at present. M.A.A.A. repeated their victory of last Monday night, by again defeating McGill 3-1. Meldrum was the mistay of the M.A.A.A. team, scoring two goals. Read and Bell also did some very effective work. McGill's combination was good and so were their back-checking, but the forwards could not get past the husky defense of their opponents. For McGill, Scott, in goal, and Rainboth, the speedy centre, were the best.

THE PLAY.

Both teams started out at a fast pace and the play was fairly even until Meldrum put his team in the lead with a pretty goal. McGill tried hard to even up and Rutherford made several clever stops. For the remainder of the period, M.A.A.A. were content with trying to retain their lead and they kept McGill from getting in close enough to be dangerous. The gong rang with the score still M.A.A.A. 1, McGill 0.

SECOND PERIOD.

McGill came back full of fight and after a few minutes of vigorous slanging, Rainboth evened the score. This rally took all the vim out of the Red and White and from this time on, M.A.A.A. had things pretty much their own way. After several attempts, Meldrum again beat Scott and put his team in the lead. The McGill team was not able to even up again and Bell soon scored another for M.A.A.A.

There was no more scoring so that the game ended, M.A.A.A. 3, McGill 1.

One of the biggest events of the season witnessed the games, which were well handled by Newsy Ladonda and Riley Horn.

The teams lined up as follows:

M.A.A.A.	McGill
Battie	goal
Springins	defence
Read	defence
Meldrum	centre
Bell	wing
Parsons	wing
Spares	McGill, Andrews and Marson

Referee—Newsy Ladonda.

Judge of Play—Riley Horn.

GOAL SUMMARY.

1st period—	1. Meldrum.
Second period—	2. Rainboth.
3. Meldrum.	4. Bell.

HOCKEY NOTICE!

The following men are requested to turn out at the Arena not later than 8:30 o'clock to-night, to play M.A.A.A. Juniors: Scott, Major, Hunter, Lowry, Aird, Martin, Kelly, McGibbon, Armstrong, Everyone bring his own uniform and sticks.

CORNELL IS IN BASKETBALL TIE WITH COLUMBIA

Blue and White Defeats Ithacans on Morningside Heights Courts in Intercollegiate League Champion- ship Game

COLLEGE BASKETBALL Standing.

	W.	L.	P.C.
Princeton	4	1	.800
Cornell	5	2	.714
Columbia	5	2	.714
Yale	3	2	.600
Pennsylvania	1	6	.166
Dartmouth	0	5	.000

New York—Columbia University undergraduates are predicting that their varsity basketball team will win the championship of the Intercollegiate Basketball League this winter following the victory of the Blue and White five over the Cornell varsity in the first of their series of two championship games on the Morningside Heights court Friday night by a score of 25 to 16.

Both teams played their hardest, as a victory for the Ithacans meant the championship of the league, while to Columbia it meant a chance to tie for the title. A record crowd of spectators turned out for the game.

The Channel Islands, which have belonged to England since 1666, are the only portions Britain now holds of the estates brought to this country by William the Conqueror.

The Department of Journalism at the University of Washington has installed a course in newspaper jurisprudence. It has attracted the attention of the city newspaper men, many of whom have enrolled in the course.

College Athletics

Terroux and Wickenden to Go to Toronto

Dale Harris Beaten by Terroux in Challenge Bout Last Night

PROSPECTS GOOD FOR NEXT YEAR

Present Team Will Not Graduate For Some Years to Come

The attendance at the fencing practice last night was quite satisfactory, there being about 15 men out. There was one challenge bout—Harvard vs. Terroux, in which Terroux was the winner, five hits to three.

After this had been settled, Professor Traquair spent some time in coaching Wickenden and Terroux, who are to represent the university at the Intercollegiate Assault-at-Arms in Toronto this week. Several faults were corrected and some new attacks were learned. Some practice bouts then took place, in which Wickenden showed to good advantage.

The rest of the men are all improving steadily and a good foundation is being laid for future work. McGill will be well represented in this branch of sport for several years to come.

The regular hours for practice are Monday at 7:30 p.m. and Thursday at 5:15 p.m., but the foils and masks are available at any time for those who want to put in some extra work.

Eric Billington

Famous McGill football player who has volunteered for service with McGill Overseas Company

ERIC BILLINGTON WILL JOIN MCGILL OVERSEAS COMPANY

Has Offered His Services in Any Capacity to Capt. G. Barclay

Eric Billington, famous McGill centre half, has volunteered his services in any capacity to the McGill Overseas Company, go with the 38th Battalion under the command of Captain Gregor Barclay. Billington was engaged in mining engineering work at Coleman, Alberta, and wrote to Captain Barclay offering his services. The latter replied that there were no vacancies in the company as officers, but that the N.C.O.s had not yet been appointed. Billington wired back that he would join the company as a private, and will arrive here to enlist in the course of a day or two.

Eric Billington is a native of Cheshire, England, and before coming to this country made a reputation for himself in the North of England as a three-quarter back at English Rugby. Upon entering McGill as a student in the Faculty of Applied Science, he turned out with the English rugby team of the college, being a tower of strength on the backfield. The following year, Billington became a member of the senior football squad, soon adapting himself to the changed style of play and displaying remarkable ability as a fullback.

Two years ago he was the star centre half-back of the senior squad, at the time being noted as the best punter in Canada. During the season of 1913 he was one of the mainstays of the half line and in the play-off with Varietys in Ottawa he was the particular star of the afternoon.

THE MILITARY HAPPENINGS AT OLD MCGILL

War Summary

These Articles Are Specially Written for the McGill Daily and are Published Each Day.

FRANCE

The French War Office has issued an official statement giving the course of events for the past two weeks. It states that appreciable results have been obtained against the Germans especially in the regions of Artois, Champagne and the Argonne and also in Alsace. It is stated that the Allied artillery has done splendid work as it has rendered the movements of German troops in the rear of their trenches exceedingly difficult and in many cases impossible.

RUSSIA

The Russian Army has turned the tables on the Germans and a Russian offensive is now developing along the east Prussian frontier north of the Bohr and Narew Rivers. Near Lomza the Russian assaults on the advancing German lines caused the advance guard to fall back on the main body and the whole were compelled to retreat for some distance. Unless Germany can strongly reinforce her eastern Army her latest attempt Warsaw is destined to fail as have the former ones. The Russians are heavily reinforcing and should be able to hold their lines against all assaults.

AUSTRIA-HUNGARY

A great artillery duel is taking place between the Russians and Austrians at Bojan, east of Czernowitz. In Galicia all attacks of the enemy have been repulsed. The fighting on the Upper San continues violently with no decisive results for either side. In south Galicia the enemy has occupied Stanisku.

GENERAL

The United States Government has officially stated that it will make no reply at present to Britain and Germany re the war zones. The aerial raid Sunday night caused no loss of life and comparatively little destruction of property. The English newspapers call it the "crowning joke of the war." Col. Seely has been appointed by the War Office to command the Canadian Cavalry Brigade.

The following notice has been posted by the Faculty of Applied Science in regard to the McGill Overseas Company:

In view of what seems to be considerable misunderstanding on the subject, the Faculty of Applied Science hereby intimates that it will extend to the students enlisting in the McGill Infantry Company the same favourable consideration that it has already given to other men entering active service.

The procedure followed has been to at once allow the year, or the degree, to students in reasonable standing, as soon as they enlist.

FRANK D. ADAMS.

February 22nd, 1915.

News From the Science Men With Artillery

Letters From Monty Montgomery And Murray Robertson Sent From Halifax Before Departure of Mantic

The first news of the McGill men who left last Wednesday with the artillery, was received yesterday. A hurriedly written postcard from Murray Robertson, sent from Halifax, gives some idea of their first movements. It told of their arrival at that place, the number of McGill men in the battery, etc. "Hit Halifax about 11 last night. Train is standing on the harbor front somewhere, but nobody allowed off. Seath and I were aroused from our dreams about 12:30 to go on guard between the cars. If any one tries to get off he goes in the clinic, and if he does get off, the guard gets locked up. We have a fine bunch. We counted up last night and there are twenty-six McGill men in the battery. Ten of these were undergraduates during the past term." A later addition was scribbled on the back. It said: "We're off SS. Megantic Goodbyes. They followed these signatures: Gilmour, Murray, Robertson, Hammond, Johnson, Pringle, Seath, E. D. McIntosh, Monty Montgomery."

The daily mail received a letter from Monty Montgomery yesterday in which he thanked the fellow for the way they turned out to see the men off. Quite a large crowd was at the station when the troops entrained. He says: "We certainly appreciated it and I think it will be a long time before we forget our departure from Montreal."

The letter closes with best regards to McGill from Gilmour, Johnson, Robertson, Seath, McIntosh and Montgomery.

MATRON'S DEATH PURE ACCIDENT

Croner McMahon did not consider it necessary to call a jury to investigate the death of Miss M. L. McMillan, Superintendent of the Mens Residence at Macdonald College, when the case came before him yesterday. Miss McMillan was instantly killed when struck by a Grand Trunk train at Ste. Anne de Bellevue Saturday afternoon.

A funeral service was held in the chapel at Macdonald College last night, after which the body was removed to Mount Forest, Ont., for interment.

More than three-quarters of a million season tickets are issued every year by railway companies in the United Kingdom.

Floating mines, under various names have figured in naval warfare for nearly 350 years; but they were first used with really deadly effect in the Russo-Japanese war of 1904-5.

U. of T. Platoon Undertaking Has Been Abandoned

Difficulties Presented Themselves in the Way of Enlisted Students

The University of Toronto platoon for which recruiting has been carried on in the last few days has been formally withdrawn. This decision is the result of a multiplicity of causes. In the first place, owing to the insistence of the officers of the 20th battalion on the appointment of their own non-commissioned officers, the platoon would not have a strict University identity. In the second place the majority of those who have volunteered are beginning to realize that the academic year will be over in two months and that at that time after having qualified, better opportunity will be given to go as officers or non-commissioned officers.

INSTRUCTION FOR MACHINE GUN SECTION

Nine Men Are to Drill This afternoon at 5:15 p.m.

One machine-gun has already arrived and the regiment hopes to procure another shortly. The following men have been appointed as a machine-gun section: A. W. Clarke for instruction at 5:15 p.m. at the C.O.T.C. Headquarters, Joseph House, on Wednesday, Feb. 23rd.

A. Company.
Sgt. Timberlake.
Cpl. Burn.
Pte. Baker.
B. Company.
Sgt. Roberts.
Pte. Muckton.
C. Company.
Cpl. McDougall, J. C.
Pte. Ralston.
D. Company.
Cpl. Buckley.
Cpl. Gervase.
Signed, G. S. S. GORDON,
Lieut. and Assistant Musketry Instructor.

SHE UNDERSTOOD.

When you inspect 25 apprentices for a position as your nursery maid for a whole morning, and then find yourself much in the same position as you started, you begin to feel tired.

What was better still, she knew how to make tea "doo" for six people without using more than three teaspoonsfuls.

Here was a capture.

"And you understand children, you say?" I gave four children, said Mrs. Newrich. "Oh, yes, I understand 'em all right, and I'll blowed if I'll work wherever I am," came the disheartening reply.—Answers.

MAJOR MAGEE OF THE MCGILL REGIMENT ISSUES OFFICIAL CRITICISM OF OUTING AT STE. ANNE DE BELLEVUE LAST SUNDAY

Few Errors Were Made on Manoeuvres—Next Saturday it has been Decided to Repeat the Same Manoeuvres Especially in Regard to the Assault and Assembly of Troops

In view of the interest and enthusiasm with which all ranks entered into and carried out Sunday manoeuvres, I think it advisable to make a few remarks and criticisms on the day's work.

With regard to the entraining and detraining of the Battalion both at Montreal and Ste. Anne de Bellevue I have nothing but the highest praise. Regular troops could not have done better. The behaviour of the men and their prompt response to bugle calls and their officers' commands could have been improved upon. Entering at Ste. Anne de Bellevue took exactly 20 minutes and this included the loading of transports.

On the march to use Forme the main body was amply protected. The Advanced, Flank and Rear Guards were properly placed and divided in proper proportions. Connections were maintained and messages arrived correctly. At the commencement of the march the scouts of the Advanced Guard utterly disregarded Clouston's Point on the right and the large island on the left. These two places should have been carefully gone over before the Main Body began its approach. It was a fine trap and the Main Body were allowed to walk right into it. A few unnecessary half signals came from the Advanced Guard to the Main Body.

The Advanced Guard should never cause the Main Body to halt. It should be sufficiently in advance to examine and reconnoitre any dangerous spots and should sweep aside any obstructions. It is only under exceptional circumstances that half signal should be sent to the Main Body. This is a grievous error and annoying to the Main Body. The Advanced Guard should never cause the Main Body to halt. It should be sufficiently in advance to examine and reconnoitre any dangerous spots and should sweep aside any obstructions. It is only under exceptional circumstances that half signal should be sent to the Main Body. This is a grievous error and annoying to the Main Body.

A further error occurred in the Advanced Guard proceeding due north on passing the aux Tourtes instead of turning to the northeast and keeping the same relative distance from the eastern shore of the Lake of the Two Mountains. This error caused the swing outwards which was noticed by everybody. The Commander of the Advanced Guard is responsible for the

error.

The naval seaman of to-day lives in a world severely regulated by law, and his course is marked out for him by a code of some magnitude. He is no mere machine, but he is a part of a great and complicated organization.

In the seventeenth century all this either did not exist or existed only in germ. There was a fixed centre of government at Whitehall, and in the dockyards, but outside of that everything was unsettled or regulated only by the custom of the sea. The mere fact that no uniform was selected for the navy till the middle of the eighteenth century is enough to show how vague was its organization. There was, indeed, no regular body of naval officers till the close of the seventeenth century. Some men did spend their lives in the navy, but even they were trusted to choose members of the King rather than members of a corps of officers. Until the end of the seventeenth century, it was not even thought necessary that an admiral or captain should be a seaman. In very early days the King's fleet were composed for the most part of merchantmen impressed for the war. The master and crew were taken with their vessel, and it was their duty to navigate her. The captain and his lieutenants were officers in command of soldiers put on board, not to sail the ship, but to fight her. This rough and ready system had begun to fall into disfavor with good judges as early as Elizabeth's time. Many thought by no means all her admirals were seamen, but the old practise lived on with the usual pertinacity of an English custom. In face of the glorious record of her times, and the triumphs of the navy of the Commonwealth, it is impossible to say that the system was always bad. No doubt a sensible landsman left his master to handle the ship, and confined himself to ordering where he was to take her. When Monk, in the excitement of battle, forgot he was no longer a colonel of cavalry, and roared out to his crew the order to wheel to the left, the sailors laughed, but the master interpreted the meaning to the man at the helm, and the ship was duly laid alongside the Dutchman. Still, a system which left a subordinate in command of a ship was bad, and became inevitably worse in proportion as naval warfare became more a matter of maneuvering. Sir William Monson, the author of the "Naval Tracts,"

had pointed out the superiority of the English captains long before Blake's time. During the Commonwealth, it seems to have been the rule to give the command of ships to sailors. In the reign of Charles the ordinary establishment of a "capital" ship, a ship of the line, was a captain, a lieutenant (though there was no officer of this rank in the smaller class of vessels), a master, a pilot, and a varying number of master's mates. The pay of a captain ranged, according to the size of his vessel, from £41 s. d. a month to £14, to which was added some very uncertain perquisites for carrying stores, giving wine, and so on. A lieutenant received from £16 s. d. to £31 s. d.; a master, from £2 6s. 8d. to £4 13s. 4d.; a pilot, from £1 13s. 4d. to £2 2s. a month. This pay lasted only as long as the ship was in commission. When once she was paid off, the officers and crew might shift for themselves.

The military camera of a Saxon named May is carried by a rocket over the landscape to be photographed, the rocket 20 feet long, and weighing 50 pounds is mounted on a special support which is raised to the degree necessary and aimed by means of sights, and the electrically-lighted powder-charger carries the rocket to a height of about 2,000 feet. As it turns to fall, exposure is made by an electro-mechanical shutter, worked by a small battery. Directly afterwards, a parabolic open, holds the camera 30 feet above the rocket, and the whole apparatus falls gently to the ground. Very faint pictures seven inches square are obtained.

To-Day's Drills

"A" and "B" Companies will Parade To-night as Usual

Time Table for Tuesday, February 23rd, 1915:—

"A" COMPANY

7.45 p.m.—Company parade in Gymnasium of Old High School for company drill.

"B" COMPANY

7.45 p.m.—Company parade in Gymnasium of Old High School for company drill.

"C" COMPANY

5.15 p.m.—Instructional Class.—C.O.T.C. parade in Drill Shed, Craig Street.

"D" COMPANY

5.15 p.m.—Bayonet Practice. Sections 5 and 6, parade in Attic of Physics Building.

7.00 p.m.—Musketry. Sections 11 and 12, parade at C.O.T.C. Headquarters for shooting.

7.15 p.m.—Musketry. Sections 13 and 14, parade at Old High School for aiming instruction.

A new danger to underground electric cables has been brought to notice by the cause has been found in the severe pounding of the road surface by the modern heavily-loaded motor vehicles. The last two or three years have brought an epidemic of faults in lead-covered cables under roadways, and
